

PRESS RELEASE
PetroSA Gas to Power Initiative aimed at Powering the Nation

Sandton, 11 July 2023

PetroSA, a subsidiary of the Central Energy Fund (CEF) is instrumental in driving energy solutions through the “Gas to Power” initiative which is currently being spearheaded to provide an early power generation solution, that leverages the commercialisation of PetroSA’s tail gas for power generation for Eskom or an alternative off-taker.

The proposed project enables the recovery of otherwise stranded gas, with the potential to improve the reserve margin for the national grid. It is anticipated that Gas supply will be via the FA platform and associated offshore infrastructure for tail gas commercialization. The 180MW to be generated will assist in ensuring that PetroSA provides sustainable energy solutions through various strategic partnerships.

PetroSA as a state-owned company will continue to will continue to collaborate with strategic partners to ensure that we deliver on its mandate of ensuring the security of energy supply for South Africa.

PetroSA is also considering various opportunities relating to the supply of aviation fuel in various airports within South African. PetroSA ventured into supplying aviation fuel to all customers including commercial airlines as one of the means to diversify its customer base and to ensure sustainability
